

Comprehensive assessment solutions for teachers and students

Edmentum™ Assessments offer a full range of assessment solutions, including diagnostic and placement assessments that help educators understand each student's unique needs to more effectively guide instruction. Our assessment solutions accurately evaluate learners and prepare them through a personalized learning path. This allows students to bypass objectives they have already mastered, gain confidence, and focus on topics that challenge them for a more relevant and satisfying learning experience.

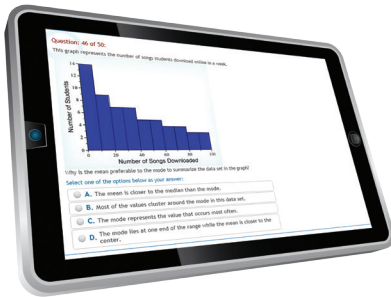

Edmentum Assessments provide comprehensive solutions that not only provide educators with the assessment tools they need, but that also integrates with curriculum, providing personalized and more effective learning. Immediate feedback and real-time progress monitoring help identify and close knowledge gaps at the individual and class level.

Impact of Test Packs with Prescriptions

To address the overall impact of Test Packs on student achievement in math, this study compared the state test scores of grade-level groups of students who used Test Packs with Prescription during the 2011 academic year to those who did not.

Edmentum™ TEST PACKS Rx

All Edmentum Assessments can be used on mobile devices, making our solution friendly for classroom formative assessment implementations.

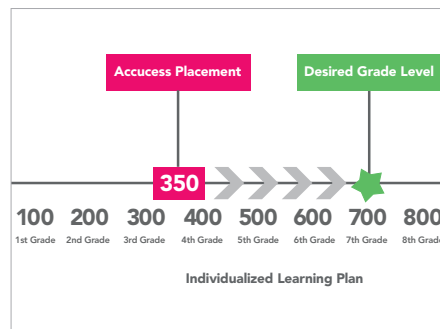

Edmentum Test Packs with Prescriptions are ideal for remediation, intervention, and acceleration programs. The assessments provide an evaluation of your students' progress and prescribe rigorous curriculum to fill learning gaps and personalize instruction for individual students or an entire class.

Edmentum Test Packs automatically prescribe assignments, or teachers can make manual adjustments before assigning lessons. Consistent alignment between test items and our rigorous curriculum assures that each learner receives an individual learning path.

Edmentum™ ACCUCESS

Edmentum Accucess is an assessment tool that quickly and efficiently measures learners grade level reading, writing, and math skills. In addition to assessing student proficiencies, the program prescribes rigorous content that fills learning gaps and personalizes instruction, bringing students up to grade level.

Educators can use Edmentum

Accucess to evaluate student knowledge and skills before beginning an instructional unit or semester. Results can be used to determine areas of special emphasis and focus for individual students or an entire class.

Edmentum™ FLEXTEST

Edmentum flexTest is a test and quiz creation tool that allows administrators and teachers to build tests with a wide variety of question types. Edmentum flexTest can also be used to modify Test Packs to provide students with a more focused and relevant assessment. Test items created with flexTest can be stored, published, and shared across a district.

Edmentum flexTest offers the ultimate in flexibility as tests and quizzes can be created for custom courses and administered at all levels, including course, unit, and module. The robust reporting monitors progress and creates tests based on learner, class, or district needs to determine if learning objectives are being met.
